PastelLink
CODE COLORFUL WORLD

We are expanding our team and looking for a number of passionate and talented IT related professionals to join us and support our continuously growing business. We are looking for System Analysts to join us to work with our software development team as a leading role for developing enterprise-grade IT solutions.

System Analyst

What you'll be doing:

- Lead a development team in mobile apps, web and / or backend API development
- Oversee and perform quality control, including code review and analysis
- Assist the project manager in communication with clients' business representatives on solution and / or functional design
- Prepare functional and technical specifications and implementation plans with the team
- Prepare software test plan, perform debugging and performance optimization with the team
- On-site support at client's location might be required

What we need to see:

✔ 5 years or above experience in software development industry

✔ Advanced level of knowledge in programming and code analysis

✔ Familiar with CI/CD tools, such as Azure DevOps, Github Actions, Jenkins etc.

✔ Hands-on experience in cloud solutions such as Microsoft Azure or Amazon Web Services

✔ Proactive problem solver

✔ Fast learner with strong ability in planning and reporting

✔ Ability to build strong collaborative and meaningful relationships with team colleagues in IT groups

✔ Good command of both spoken & written Chinese and English

- Experience in leading positions would be a plus
- Candidate with less experience might also be considered
- Basic understanding of containerized application and container orchestration is a plus
- Hands-on experience in application monitoring and diagnostics tools would be a plus
- Experience on SharePoint Online application development is a plus

📞 +852 3619 7091 ✉ hr@pastellink.com
